AGAROSE MOLECULE

ALGENESS[®]
THE 100% NATURAL
& BIODEGRADABLE
INJECTABLE IMPLANT

Algeness[®] 
100% NATURAL

As we age, we lose the volume in our face that makes our skin look plump and youthful. Dermal fillers are commonly used to 'fill out' lines and wrinkles, add volume to the cheeks and plump up thin lips. There are many different types of dermal fillers available on the market and it is difficult for the patient to understand which one is best for them, raising many questions.

MASTER THE POWER OF YOUTH

That is why **Advanced Aesthetic Technologies Inc.** a USA based medical device company employing bio-technologies and driven by excellence, focused its research on developing a new all natural filler to respond to the patient's needs in facial correction.

ADVANCED AESTHETIC TECHNOLOGIES

A NEW ERA OF FILLER
INJECTION TREATMENTS IS BORN

Algeness® dermal filler is the culmination of 10 years of scientific and clinical research. 100% natural and biodegradable, **Algeness® is the first of its kind and is intended for all patients seeking high quality, non-allergenic safe dermal facial injections.**

THE FUTURE IS WYSIWYG & 100% NATURAL

SAFE SOLUTIONS FOR THAT
NATURAL YOUTHFUL LOOK

Women are increasingly demanding safe solutions from their beauty professionals. They are less willing to compromise and take for granted information provided by manufacturers. In the pursuit of a youthful look, health conscious women want safe and natural biocompatible products, free from chemicals and solvents.

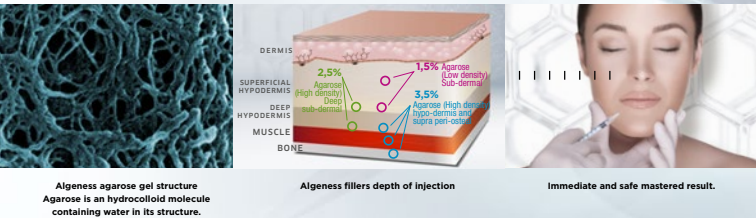

Algeness® 
100% NATURAL

ALGENESS® SUBDERMAL FILLER A BREAKTHROUGH IN THE MEDICAL AESTHETIC INDUSTRY

Algeness® is a biomaterial consisting of a purified agarose gel (polysaccharide), derived from a sophisticated manufacturing process.

For the first time in aesthetic medicine history, a 100% natural, biocompatible and biodegradable filler is available to you.

Algeness agarose gel structure
Agarose is an hydrocolloid molecule containing water in its structure.

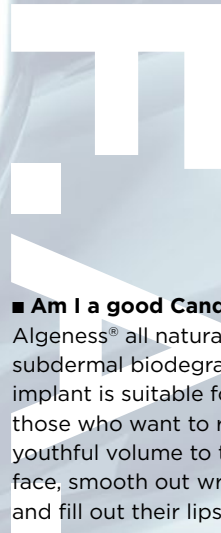

Algeness fillers depth of injection

Immediate and safe mastered result.

WITH ALGENESS® 100% NATURAL BIODEGRADABLE IMPLANT, WHAT YOU SEE IS WHAT YOU GET!

Thanks to the Algeness® molecular and biophysical structure, as well as our unique injection procedure, your physician is able to Master your Results™ immediately, as opposed to waiting days or even weeks to see the final results.

This capability we call Mastering your Results,™ a technique of micro injections and massaging which sculpts and contours for the desired effect and shape.

■ Am I a good Candidate?

Algeness® all natural subdermal biodegradable implant is suitable for those who want to restore youthful volume to their face, smooth out wrinkles and fill out their lips.

■ Is it painful?

All injections cause a sense of pain; however, the physician may decide to apply anesthetic cream to the injection site to numb the area.

■ What kind of results can I expect?

Algeness® subdermal filler is able to achieve a youthful and natural look by filling out lines around the mouth, the naso-labial fold as well as crow's feet and forehead wrinkles. It can also re-plump your lips and add volume and lift to your cheeks.

■ How long will it last?

Algeness® corrective effects typically last for 12 months or longer depending on the injection amount and depth of injection.

■ **What are the side effects?** Depending on the area injected, the procedure is relatively painless, although there may be some mild discomfort during treatments to the sensitive nose or lip areas. There may be some redness around the site of injection for 1-2 days. Thanks to its unique all natural bio-compatibility, post- treatment allergic reactions are highly unusual.

■ What is the recovery time?

Treatment times may vary from 20-50 minutes, depending on the correction level requested by the patient. The recovery time can be from a few hours to several days depending on the area treated. Usually, patients receiving Algeness® treatments return to normal activities straight after the injection.

■ What is the difference with other fillers?

Unlike all other fillers, Algeness® is 100% natural and biodegradable. Algeness® achieves its volumizing youthful effects without the requirement of any added chemicals, solvents or cross-linked agents and is completely and safely absorbed over time by the body's natural mechanisms.
